Chief Architect, Gangverk
Co-founder, basta.app
Final-project supervisor,
Reykjavík University

Sara Nassim
Filmmaker & Producer

Full-stack software developer who contributes at every stage, from problem framing and design through shipped production code. Three years building Alda's micro-learning and survey platform (React/TypeScript/Next.js, Python/Django, AWS), increasingly with AI in the loop. Before tech, coordinated film productions and ran cultural events, where I learned to coordinate people, deadlines, and moving parts across teams.

EXPERIENCE

May 2023 – Present

Alda Solutions — Software Developer & UX Specialist

Promoted from Junior Developer (2024)

- Built the micro-learning courses platform from inception, covering architecture through production, including content production. Over 70 micro-learnings for learners in 50+ countries.
- Implemented UX designs from studio partners and created original designs in Figma, building UI components and interface elements across the full design-to-code workflow.
- Designed and built customer-facing survey reports with data visualizations that make complex results clear and actionable.
- Drove accessibility practice (WCAG 2.1 AA) across the web app and course content.
- Contributed to building an Alda AI training chatbot.
- Expanded what the team can ship by working AI into daily development, using Claude Code, evaluating emerging tools, and building AI orchestrators.
- Ran team retrospectives and shaped ways of working to fit each team's dynamic, drawing on Alda's leadership program and hands-on practice.

December 2023

Fróðleiksfúsi — Final Project, Reykjavík University

Educational game for Þekkingarsetur Suðurnesja: React Native + headless CMS via Apollo GraphQL. Collaborated with Jökulá UX/UI design studio. Went into production on delivery; received top marks.

EDUCATION

2021–2023

Reykjavík University
